***Response to Amendment***

1. This action is responsive to the communication filed on July 27, 2007.  
Claims 18,21 and 25 have been amended. In response to the amendment and telephonic discussion with attorney of record Mr. Dennis Donahue the examiner has withdrawn the recent non-responsive notice and restriction requirement.  
Claims 1-35 are now pending.

***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species of the claimed invention: Species 1 (A method for peer-to-peer messaging between network resources includes communicating with a first process by writing a first text file in a first scratch space; P [0019]); Species 2 (A method for peer-to-peer messaging between network resources includes reading a text file received within a scratch space to find a digital signature within the text file; P [0020]); Species 3 (A method for peer-to-peer messaging between network resources includes reading a text file to find at least one portion of the text file and to find a digital signature within the portion; P [0021]) ; Species 4 (A method for peer-to-peer messaging between network resources includes obtaining, by a first arbiter, a first output of a first process, parsing information within the first output into a first set of text file; P [0022])

Related inventions are distinct if the inventions as claimed are not connected in at least one of design, operation, or effect (e.g., can be made by, or used in, a materially different process) and wherein at least one invention is

Art Unit: 2155

patentable (novel and non-obvious) over the other (though they may each be unpatentable over the prior art). See MPEP § 802.01(II).

In the instant case, the Species 1, 2,3 and 4 are not connected in at least mode of operation, which is clearly evidenced by Paragraph [0019-0022].

The Examiner has determined that the additional attributes present in Species 2,3 and 4 would not be an obvious variation of attributes present in Species 1 to one of ordinary skills in the art. Therefore, Species 1 is patentably distinct from Species 2,3 and 4, though they may each be unpatentable over the prior art.

The Examiner has determined that the Species 1-4 differ in mode of operation from one another in ways that would not be obvious to one of ordinary skills in the art at the time the invention was made. Therefore, Species 1-4 are patentably distinct from one another, though they may each be unpatentable over the prior art.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2155

A telephone call was made to the applicant's representative (Mr. Dennis Donahue) on October 18th, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is given **ONE (1) MONTH, or THIRTY (30) DAYS** from the mailing date of this communication, whichever is longer, within which to respond to this election/restriction requirement in order to avoid abandonment (35 U.S.C. § 133). Extensions of this time period may be granted under 37 CFR 1.136(a).
